50 Practical AI Prompts for Customs Agents

This short guide provides practical AI prompts designed to support customs agents, consultants, and trade compliance professionals in day-to-day work. AI should be used as a support tool and all outputs must be reviewed by a qualified customs professional.

Tariff Classification & HS Codes

- Explain the classification principles for a product using the HS General Rules of Interpretation.

- List possible HS headings and explain why each may apply.

- Draft a classification rationale suitable for audit review.

CDS & Declarations

- Explain CDS data elements required for a UK import declaration.

- Create a checklist for preparing a CDS import entry.

- Explain common CDS validation errors.

Compliance & Audits

- Create a customs compliance audit checklist.

- Summarise HMRC expectations during an audit.

- Identify common customs compliance risks.

Rules of Origin

- Explain preferential vs non-preferential origin.

- Create a decision tree for UK–EU origin rules.

Professional Communication

- Draft a professional email requesting missing invoice details.

- Rewrite a technical customs explanation in plain English.
